

Raintight Compression Couplings

Compression-style coupling with internal sealing ring to join two lengths of EMT. Zinc-plated steel. Concrete-tight, raintight.

East Electric Steel EMT Raintight Couplings are UL listed for WET LOCATIONS and used to join two lengths of EMT conduit. Zinc Plated Steel, UL Listed, NEMA/ANSI FB-1 compliant.

Features

- Hex on the gland nut creates a flat, smooth surface for convenient wrenching
- Installation is safe and sealed
- Interior shoulder conduit stop offers positive seating of conduit inside the body

Standard Materials

- Body/Compression Nut: Zinc-plated steel
- Sealing Rings: Thermoplastic
