

## 4 11/16" Single Gang Device Rings & Covers

4-11/16" single gang device rings are used with 4-11/16" square boxes to mount switches, receptacles and devices. Angled slots on the covers compensate for up to 12° of box misalignment on upright framing members. 4-11/16" square covers are used to cover 4-11/16" square box wiring and provide a means for access when future conduit runs are required.

### Features

- Ideal for exposed work applications, providing an easy method for the installation of electrical devices
- Can be used on any 4-11/16" square box

### Standard Materials

- Galvanized Steel
