

## Pull Elbows

Pull elbows are used to connect two lengths of threaded rigid / EMT conduit to form a 90° bend.

East Electric 90° EMT Combination pull elbows for Rigid to EMT conduit are designed for use when 90° turns are needed in conduits. The set-screw and threaded pull elbows are protected from moisture and damaging particles by a neoprene gasket; removable covers facilitate easy wire pulling. Manufactured from corrosion resistant zinc die cast; available in trade sizes from 1/2" to 1"; UL listed.

### Features

- Removable aluminum cover and neoprene gasket to facilitate wire pulling
- Raintight when assembled with rigid conduit
- Zinc die cast

### Standard Materials

- Body: Zinc die cast
- Cover: Aluminum
- Gasket: Neoprene
- Finishes: Natural
