

EAST ELECTRICAL SUPPLY INC

Specification Sheet - 2025-2

AC Disconnects

The Air Conditioner Disconnect (ACD) is a device situated between the load center (also known as the distribution panel) and the air conditioner unit. It provides a visible means of disconnecting power, which is particularly useful for installers or repair personnel.

Features

- Easy to install
- Non-fused pull out type, 60 amp rating
- 240V

Standard Materials

- Galvanized Steel Housing
