

## 225DEG EMT Elbows

EMT elbows are used to change the direction of EMT conduit.

The interior and exterior surface of East Electrical EMT elbows are free from defect with a smooth welded seam, evenly coated in zinc during the hot dip galvanizing process. Elbows are available in normal trade sizes from 1/2" to 4", with a 15°, 22.5°, 30°, 45°, and 90° bend.

### Features

- Hot-dip galvanized for corrosion resistance

	225DEG EMT Elbows
