EMT - Electrical Metallic Conduit

Features & Benefits:

- Consistent Quality – East Electrical EMT Conduit is manufactured for long life, durability and strength, and is suitable for bending. The steel is welded to ensure quality standards are met and exceeded. We do not have any trouble with welds split or wrinkle from severe bending caused by improper raw materials or poor quality control during pipe welding. The product is easy to cut, form and join.
- Excellent ID smoothness – During the manufacturing process we remove all ID residual flash and place a protective coating over the galvanizing to providing a much longer life cycle and excellent smoothness. This then ensures more wire capacity, and less friction between wall to wire during pulls.
- Lower Life-cycle costs – Our EMT Conduit resists cracking, flaking, peeling, impact, and damage from severe bending. Its physical and mechanical properties ensure that the pipe has an extended life cycle, great for usage or storage without trouble in quality.
- Protection from Environmental Damage and Mechanical Use – the thorough inside and outside zinc coating of East Electrical Conduit provides enhanced, second to none corrosion protection.

Conduit Bodies

Set Screw LB Type - EMT with Cover and Gasket

Features & Benefits:

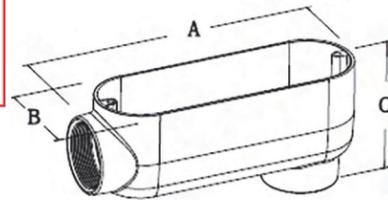

- Acts as pull outlets for conductors being installed and allows for changing direction and making bends in a conduit system.
- Die-cast copper-free aluminum construction is lightweight and corrosion resistant for long reliable service.
- Epoxy powder coat finish provides additional corrosion resistance.
- Rated for wet locations when used with cover and gasket to join threaded rigid conduit.
- Copper-free Aluminum construction with Aluminum covers and Neoprene gaskets and stainless steel screws.

Non-Metallic Liquidtight Fittings

Straight Connectors

Features & Benefits:

- Liquid-tight connectors are used to terminate and seal Liquid-Tight Flexible Type B Non-Metallic Conduit to either an oil-tight, liquid-tight or rain-tight box or enclosure.
- Resists salt water, weak acids, gasoline, alcohol, oil, grease and common solvents.
- For use in dry or wet locations.
- No disassembly required.
- Reusable.
- Constructed with 6/6 Nylon
- Straight Type - Gray
